

Application No.: 10/722,543

Docket No.: 2336-223

**REMARKS**

The Examiner's indication of allowable subject matter of claims 1-10 is noted with appreciation.

Claims 1-10 are pending in the application. The claims have been amended to better define the claimed invention. The Abstract has been revised to be compliant with commonly accepted US patent practice. No new matter has been introduced through the foregoing amendments.

The *35 U.S.C. 112, second paragraph* rejection of claims 1-10 is believed overcome in view of the above amendments, which have been made in the manner kindly suggested by the Examiner in page 2 of the Office Action.

The drawing objection is also believed overcome because the allegedly unshown claim features are no longer recited in claim 8. The features of amended claim 8 are clearly shown in FIG. 5 which illustrates first feeding element 530 being arranged parallel to common ground element 510 and connected to first radiating element 520 at a predetermined location adjacent common ground element 510, and second feeding element 550 being arranged perpendicularly to common ground element 510 and connected to second radiating element 540 at a predetermined location adjacent to common ground element 510. Withdrawal of the drawing objection in view of the above amendments and remarks is believed appropriate and therefore courteously solicited.

Each of the Examiner's objection/rejections has been overcome. Accordingly, Applicants respectfully submit that all claims are now in condition for allowance. Early and favorable indication of allowance is courteously solicited.

The Examiner is invited to telephone the undersigned, Applicant's attorney of record, to facilitate advancement of the present application.

To the extent necessary, a petition for an extension of time under 37 C.F.R. 1.136 is hereby
